

# WHAT IS HENNA?

Henna is a natural temporary dye that is applied in the form of a paste onto one's skin

In Henna Club, we apply henna artistically onto our hands. Once the henna dries, we wash it off or rub it off to see the stain that is left behind. The stain on our hands will last up to one to two weeks, depending on how long the henna was kept on our hands before being washed/rubbed off.
